**GENERATOR SETS:**
- 27kW to 3250kW Outputs
- Diesel & Natural Gas Gensets
- CHP Systems with Full Integration

**ATS OR PSG:**
- ATS 100A up to 4000A
- Generator Docking Station 100A to 5000A
- Paralleling Gear LV/MV (480V to 15,000V, 10,000A)

**UPS:**
- Single & 3 Phase UPS
- Rack Mount to Floor Mount UPS
- 1kVA to 2000kVA
- Extended Run Time Battery Cabinets
- Power Conditioners
- UL 924 Lighting Inverters (UPS)
- Battery Monitoring

**BATTERIES:**
- Stationary Lead Acid Batteries
- UPS
- Wet Cell Batteries (DC Plants)
- NiCad Batteries

**TRANSFORMERS:**
- High Efficiency Transformers (DOE 2016)
- Energy Station PDU (Power Dist. Unit)
- Harmonic Conditioners
- Remote Load Centers (RPP)
- Power Metering

**CDU:**
- 20A, 30A, 50A Options
- 120V, 208V, 240V, 400-415V
- Basic, Metered & Smart Options
- Custom Configurations
- Server Cabinets
- Custom IT/Industrial Enclosures

**LEAK DETECTION:**
- Water or Water Based Liquids
- Water, Hydrocarbons or Solvents
- Acids/Bases/Water Based Liquids & Hydrocarbons

SERVICE AND SUPPLY FROM UTILITY INPUT TO LOAD

Whatever your application, we have the experience to meet your service and supply requirements. We specialize in complete systems, but will supply and maintain any individual section of your systems power management.

Consider the following services:

- Planned maintenance programs
- “One Stop Solution” for all your power needs
- Working with you to determine the most efficient solutions
- Battery testing
- Trouble shooting of the complete system
- Guaranteed total system performance
- Your total supply partner
- Load bank testing

For more information on our Electric Power Products and Services, please visit our website cpower.com, or call 816.415.6700

One of our Electrical Equipment specialists will make an appointment to discuss your total AC/DC power requirements, whether it be supply or maintenance. We are also available to give our input when new systems are being developed, and answer your questions.
